

American Cherry Tung Oil Satin Poly

This finish brings out the deep red-brown patina, typical for American Cherry. The hand-applied tung oil seals the floor with a wear-resistant satin lacquer. Tung oil was used by the Chinese thousands of years ago to protect and show the depth of the wood patina. This finish is beautiful on a wood selection with some variation in colour and character, such as sapwood and knots. A truly timeless finish both in wide plank or traditional parquet patterns.

Species	American Cherry
Finish*	Satin 2k Lacquer
Origin	American Black Cherry (<i>Prunus Serotina</i>) mainly over 80 years old. Grown in responsibly managed forests in the northern states of the USA.
Maintenance	This finish can be cleaned regularly using our Premium Poly Fresh, which feeds and strengthens the surface over time.
Spot repair and Refinish	Professional maintenance with our Premium Polish will protect this floor for a very long time. For spot repairs and refinishing, we can provide efficient solutions.

Structure**

Engineered: 19.5 +/- 0.5 mm, top layer 4.5 +/- 0.5 mm

Solid: 19.5 +/- 0.5 mm

Color variation

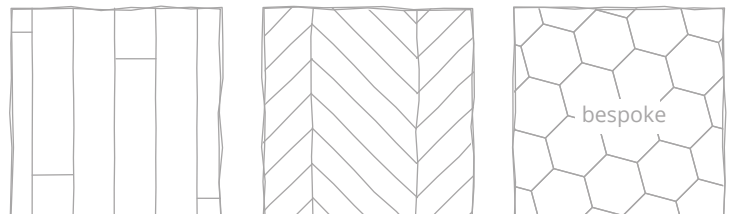

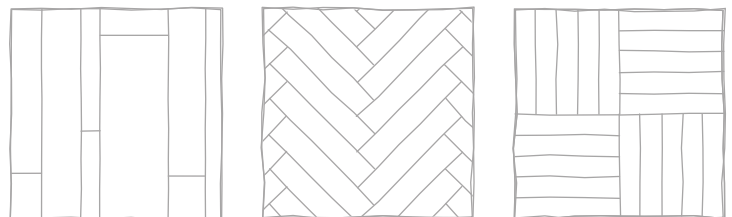

Traffic resistance

Patina change in time

Recommended patterns

*) Whilst our sampling and photography endeavours to show grain and colour as natural as possible, a sample or photo are never an exact representation of an entire floor. Wood being a natural material, variation in colour and grain exists, floors may change appearance over time through exposure to light, wear and tear and maintenance.

**) Prefinishing of solid floors may be subject to more strict recommendations for limited board dimensions and climate control. Read further on the next page.
